

## Create your own ionic frieze

The Ionic frieze was a continuous relief band that decorated the four sides of a temple and could tell/narrate stories with myths, celebrations, battles and gatherings of the gods.

### Create your own ionic frieze!

1. First think the god or goddess you would like to dedicate the temple to
2. Try to recall a story from their divine life or choose a celebration that was dedicated to them, even a battle in which they participated and try to decorate with this the frieze.  
**Alternatively**, you can invent your own god and create with your imagination any story you want.
3. Use measuring paper or join 2-3 sheets of paper (A4) to make the continuous frieze.
4. Draw or make a collage and stick your own figures on the paper.
5. Add bubbles with the words that each character might say.

### If you want, you can also make a 3D Ionic frieze!

Use white craft clay that is easily molded while it is fresh and dries without baking and Make all the figures you can imagine. Paint the skin, the hair, the clothes and the objects that the figures hold!
